Subject: FW: Central Sands Fields

Below is a discussion that I had with Matt Komiskey, Juneau county Land and conservation district. I just wanted to make you aware that there could be fields that CSD leases, but does not own that are not included in the its NMP because they only apply fertilizer to the fields.

Subject: Central Sands Fields

Hi Cheryl,

I know last time we talked we discussed the amount of land operated by Central Sands Dairy and you were correct that the nutrient management plan done for the dairy only has to account for fields that have manure applied. This means that they can operate the other fields and don't have to report the commercial nutrients applied, which is a surprise to me. So Central Sands could operate even more fields that what is included on the plan maps. I just followed up on this and thought I would share.
